

1. How many Types of comment are available in java.

There are three comments are available in java

1. Single - line comment

2. Multi - line comment

3. Documentation comment

1. Single line comment:

The single line comment is used to comment only one line

Syntax :

" this is single line comment

2. Multi - line comment

The multi line comment is used to comment multiple line of code

syntax :

```
/* This is multiline comment */
```

3. Documentation comment.

The Documentation Comment is used to create documentation API

syntax

```
/* This is documentation  
comment */
```

example

```
/* *  
 * The HelloWorld program  
 * implements an application that  
 * simply display "Hello world".  
 * @author Shivali  
 * Version 1.0
```

```
*/
```

```
public class HelloWorld
```

```
{
```

```
    public static void main  
        (String[] args)
```

```
{
```

```
    // prints Hello world!
```

```
    System.out.println  
        ("Hello world!");
```

```
}
```

```
}
```

Output

Hello world !
